DETAILED ACTION

Specification

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections

Claim Rejections - 35 USC § 112

Claims 1-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Correction or clarification is required.

In claim 1, the recitation “the voltage level” on line 10 lacks clear antecedent basis. It is unclear what the “weighted outputs” on line 12 are and how the recitation “the voltage level correction circuit correcting the voltage level by combining weighted outputs of the switching circuits” is read on the preferred embodiment. Insofar as understood, no such limitation is seen on the drawings. The same is true for claim 14.

In claim 2, it is unclear how the correction circuit can be constructed from “a negative feedback circuit” and where feedback circuit is and how this limitation is read on the preferred embodiment or seen on the drawings. The same is true for claim 15.

In claim 5, the recitation “the output voltage average value” 4 lacks clear antecedent basis. The same is true for claim 18.

Art Unit: 2816

In claim 6, it is unclear what the “negative feedback type amplifier” is. The same is true for claim 19.

The remaining claims are dependent from the above claims and therefore also considered indefinite.

Allowable Subject Matter

Claims 1-26 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The claims are allowed because the prior art of record does not show the “voltage correction circuit” as combined in claims 1 and 14.
